

# Gun Crime Victim Aggregation

This map represents the spatial distribution of gun crime victims during the period 2018 to 2022. Victims have been aggregated into 1,000 x 1,000 foot cells.

Only individuals who were the direct victims of a crime incident involving a gun were considered. Victim categories such as 'Business' and 'Government' were excluded from the analysis. All cells that contain fewer than two victims are not displayed.
